THE DRAABE COMPACT SYSTEMS

A SINGLE, ALL-INCLUSIVE RENTAL PRICE

Small, flexible and zero investment costs: the DRAABE Compact systems are the economical solution for all rooms whose humidification needs do not exceed 10 kg/h. All maintenance and a lifetime guarantee are included.

DRAABE DuoPur Compact

DRAABE DuoPur produces water treated to hygienic standards and the high pressure required for ultrafine atomisation. For maintenance, the system is simply replaced in a matter of minutes once every six months.

from
€ 259*
rent/month

DRAABE TrePur Compact

DRAABE TrePur is used to treat water for especially sensitive applications: the integration of an additional conductance synthesis unit strips all minerals out of the water to provide 100 % dust-free humidification.

from
€ 359*
rent/month

DRAABE DuoPur Compact

Water treatment and high-pressure pump with max. output of 10 kg/h. Can be combined with up to six DRAABE NanoFog humidifiers and DRAABE HumSpot digital control units.

DRAABE NanoFog

High-pressure nozzle humidifier.

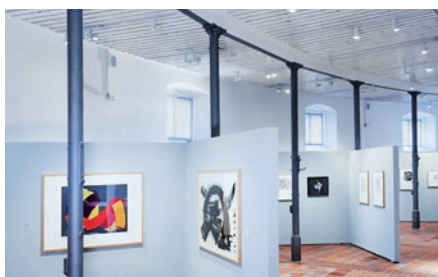

DRAABE HumSpot

Digital control unit for air humidification.

DRAABE TrePur Compact

Water treatment, conductance synthesis unit and high-pressure pump with max. output of 10 kg/h for up to six DRAABE NanoFog humidifiers and six DRAABE HumSpots.

* Incl. one DRAABE NanoFog humidifier and one DRAABE HumSpot digital control unit

THE PEACE-OF-MIND PACKAGE

100 % HYGIENIC AND A LIFETIME GUARANTEE

Installation

For new installations or retrofits, DRAABE Compact systems require very little space and are easy to integrate into any building with minimal effort. The only requirements are a mains water connection and drain, a power connection and a single payment for the installation project.

Container replacement

DRAABE DuoPur and DRAABE TrePur are both housed in a portable, compact container. Every six to eight months, you will receive a fully serviced and disinfected replacement device. Technical improvements will be automatically installed as part of this routine maintenance work.

General overhaul

The DRAABE NanoFog pure water fogging units are overhauled and replaced every two years. This preventive maintenance includes the disinfection and rinsing of all supply lines. In this way, we guarantee optimal energy consumption and maximum health protection even after many years.

In just a few simple steps, the used DRAABE Pur Container is replaced with a fully serviced system. Ensuring hygiene and safety are kept at optimum levels without additional costs, time or materials.

Your benefits:

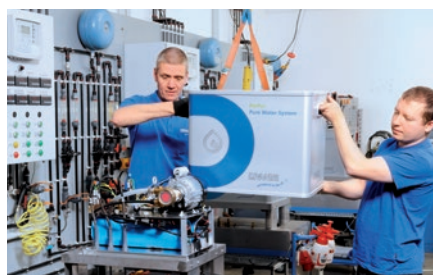

- Professional humidification
- Zero investment costs
- Always hygienic and reliable
- No hidden maintenance costs
- For any building
- Easy expansion options
- Lifetime guarantee
